

## **Create a Home Museum**

Visiting a museum sparks curiosity, strengthens observations skills and critical thinking. You can turn everyday objects in your home into this fun learning experience.

### **Here's How**

#### **1. Create a Collection**

Your child can choose rocks, coins, toy cars, shells or any favorite objects.

#### **2. Sort and Group**

Encourage your child to think about what the items have in common and how they could be organized.

#### **3. Display the Collection**

Use a shoebox, small jars, containers or even an egg carton to show off the items.

#### **4. Label the Exhibits**

Help your child write simple labels; this is a great way to make writing purposeful.

#### **5. Give a Museum Tour**

Have your child explain their collection to family or friends in person. This is a great way for your child to practice speaking and sharing their ideas.

### **Extension Activity**

Use the link below to explore museums around the world together. Your child can compare their exhibit to the exhibits they see in the museums.
