

## Chart the Weather

Day	Date	Weather <small>Sunny, Cloudy, Rain, etc.</small>	Temperature		Sunrise	Sunset
			High	Low		
Monday						
Tuesday						
Wednesday						
Thursday						
Friday						
Saturday						
Sunday						

Chart the temperatures of a month and make note of the activities you did on weekends.

1. Look up the predicted weather each morning and write the high and low temperature in a table.
2. Then look outside to determine if it is a sunny, cloudy, or snowy day. Record that in your table.
3. After the month is over, look back at the table and talk about what you notice. Are there any patterns? Was the weather generally the same temperature? How often did the sun come out?
