

## **Neighborhood Number Scavenger Hunt**

Turn a simple walk around your neighborhood into a fun math adventure! As you explore, encourage your child to look closely at numbers and objects they see every day. This activity builds observation, number sense, and curiosity about the world around them.

### **What You Need**

Paper and pencil to record findings

Camera or phone to take pictures of what you find (optional)

### **Directions**

1. Before heading out, make a list of things to find and count around your neighborhood.
2. Bring your list and take turns spotting items together.
3. If you see additional items to count that you had not included, feel free to add them to your list.

### **Suggested Ideas to Include**

#### **Kindergarteners**

- Find a house number that has a 3 in it.
- Count how many dogs on leashes you see.
- How many doors are painted a bright color (like red, blue or yellow)?

#### **First Graders**

- Find a house number where two digits add up to 10
- How many white cars are parked on your block?
- Count how many fire hydrants you pass.

#### **Second Graders**

- Find a house number with a 7 in the ones place and a 5 in the tens place?
- How many mailboxes are on your street?
- How many gates are closed?

**Extension Ideas**

**1. Neighborhood Map**

Draw a map and mark where you found each item.

**2. Photo Collage**

Take pictures of the items you found and make a “Math in My Neighborhood” collage.
