

# Dominoes Parking Game

## Directions

1. Mix up the dominoes and turn them over.
2. Take turns turning over a domino, adding the dots to find the total. For example, if your domino shows 2 dots and 5 dots, that makes 7. Find the number 7 on the gameboard and place the domino in that spot.
3. If you find another domino that also adds up to 7, such as 4 and 3, stack it on top of the first one.
4. When you are done, look over the game board together and talk about what you see. For example, which numbers have more than one domino? Why do you think that is? Did anything surprise you?

0 zero	1 one	2 two	3 three	4 four	5 five	6 six
7 seven	8 eight	9 nine	10 ten	11 eleven	12 twelve
